SELECTED PROJECT

Racepulse | F1 Edition

[Case Study](#) | [Live Application](#) | [Github](#)

Racepulse | F1 Edition, an unofficial visualizer for Formula 1 races post-1996, provides enthusiasts with a captivating exploration of race data and dynamic visualizations. Built on Next.js and React, powered by the ERGAST API, and incorporating D3.js for intricate data visualization, the platform ensures a seamless user interface. Styled with ShadCN and Tailwind CSS, this project reflects a shared passion for Formula 1, offering enthusiasts a digital space to relive races and dive into detailed driver information with a perfect blend of innovation and user-friendly design.
